

*For healthcare organizations to maintain financial stability, it is imperative that revenue, cost and utilization information be readily available to all that need it.*

## Information Manager

**HCC Information Manager** utilizes the popular and widely used technologies from **Business Objects™** for querying, reporting, and analyses. This application provides a feature-rich integrated toolset that can report and analyze data from **HCC Contract Manager**, **HCC Cost Accounting Manager** and **HCC Best Practice Manager**, as well as to incorporate information from other data sources throughout the enterprise.

### Business Insight

The typical reports used historically to monitor the operations of healthcare organizations often raise as many questions as they answer. With easy-to-use on-report analysis, **HCC Information Manager** turns a report into a valuable investigation tool. Data can be grouped or reorganized to show trends or highlight problems. Without having to swap tools, users can drill down into the detail underlying a summarized report or even drill through to other related reports. Save and distribute reports to all or specific users in a variety of formats.

- ◆ Improve decision making with 'point-and-click' access to performance and profitability information.
- ◆ Reduce time to complete and publish ad hoc analyses.
- ◆ Empower management staff with current information.
- ◆ Customize individual data views with browser-based "My InfoView" portal.
- ◆ Easily drill down into data to understand the "why" of query results.
- ◆ Integrate information from multiple sources without interfacing data.

**Focused Solutions for Clear Results**

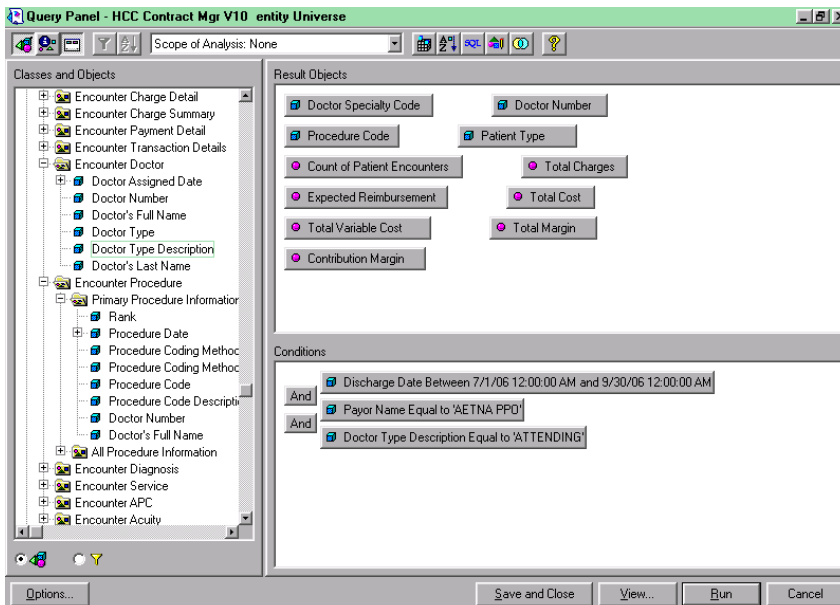

*Hospital Cost Consultants LLC is a leading provider of cost and reimbursement management software and services. With over 25 years of experience in the healthcare industry, HCC offers a full range of implementation, training, and consulting services to complement its decision support applications-- Contract Manager, Cost Accounting Manager, Best Practice Manager, and Information Manager. All are available as stand-alone products or as part of an integrated decision support system that utilizes a single patient encounter database for consistent, enterprise-wide reporting.*

## Use HCC Information Manager to ...

- Transform data into strategic information using on-line analytical processing (OLAP)
- Perform multi-dimensional analyses on financial and clinical data found in your HCC database **and in other enterprise data sources**
- “Point and click” data mine and drill down to arrive at relevant levels of detail
- Expand upon pre-defined reports that can be transformed into presentation quality graphics
- Manage and organize distribution of reports and analyses
- Use your browser to create queries, reports and to view reports created by others

Top 5 Underpaid Contracts - YTD
